

ABSTRACT OF THE DISCLOSURE

Systems and methods are provided for determining an indication that an application for a mortgage loan to secure a property may result in closing of the loan transaction. In one embodiment, a method includes receiving application information, such that the application information includes at least borrower information, property information, and a first interest rate; receiving home value information, such that the home value information represents an estimated value of the property; receiving a second interest rate; and determining the indication based on the received application information, received home value information, and received second interest rate, such that the indication represents a likelihood that the mortgage loan may result in closing.
